EDUCATION

Ajay Kumar Garg Engineering College

Bachelor of Technology in Information Technology

Ghaziabad, India

Expected 2028

EXPERIENCE

Big Data Centre of Excellence

Trainee

Sept. 2025 – Nov. 2025

Ghaziabad, IN

- Developed mobile applications using **Flutter** framework and Dart programming language, translating UI designs into responsive code.
- Collaborated with designers to create user-friendly app interfaces, optimizing application performance and reducing render times.
- Troubleshoot technical issues reported by users, reviewing code errors to enhance overall stability.

PROJECTS

LEARN LEDGER 🔗 | Solana, Next.js, Gemini/GPT-4

- Architected a privacy-first AI tutor on **Solana** that mints learning history as dynamic, transferable NFTs via Metaplex.
- Engineered a model-agnostic orchestrator to switch between **Gemini** and **GPT-4**, verifying educational accuracy and reducing hallucinations.
- Implemented **SHA-256 cryptographic anchoring**, securing off-chain chat data with on-chain proofs for tamper-evident verification.

DEALFLOW 🔗 | React, Gemini Vision, Make.com

- Built an automated engine using **Gemini Vision API** to extract, validate, and cross-reference physical receipts against digital policies in real-time.
- Orchestrated an end-to-end settlement pipeline, reducing claim processing from days to seconds via a custom rules-based decision algorithm.
- Developed a dual-dashboard system for instant liquidity management (Insurer) and transparent claim tracking (Consumer).

MANTLE 🔗 | Mantle L2, Solidity, WebSockets

- Engineered a gasless gaming architecture on **Mantle Sepolia** using meta-transactions and backend-sponsored execution to eliminate wallet friction.
- Designed a three-tier permission delegation system, enabling secure, limit-based asset spending without repeated user signatures.
- Synchronized high-frequency game state across clients using **WebSockets**, bridging real-time multiplayer interactions with on-chain treasury governance.

SKILLS

Languages : Java, Python, C/C++, Kotlin, JavaScript (ES6+), Solidity, Rust

Web Development : React.js, Next.js, Node.js, HTML5, CSS3, Tailwind CSS

Blockchain & Web3 : Ethereum, Solana, Polygon, Hardhat, Remix IDE, Chainlink (CRE), MetaMask

Backend & Tools : Supabase, Firebase, REST API, Git, GitHub, Android Studio, VS Code, Figma, Linux
